LICENSE

Each model has different licenses. Visit www.lg.com for more information on the license.

The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI Logo are trademarks or registered trademarks of HDMI Licensing Administrator, Inc. in the United States and other countries.

↓↓↓ MaxxAudio[®]

MaxxAudio and additional MAXX trademarks are trademarks and/or registered trademarks of Waves Audio Ltd.

The following content is only applied to the monitor which is sold in Europe market and which needs to meet the ErP Directive:

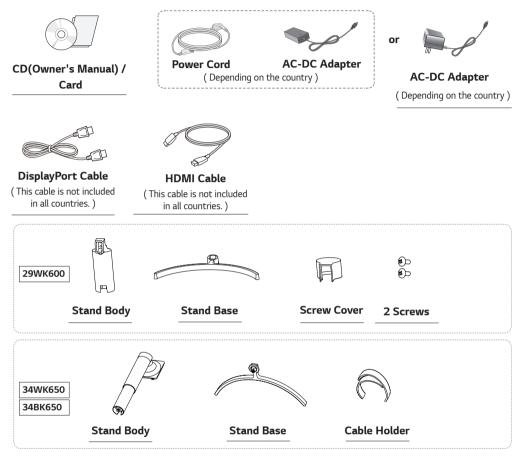

* This monitor is set to be turned off automatically after 4 hours when you turn on the display and there is are no adjustments made to the display.

* To disable this setting, change the option to "Off" in Settings menu of "Automatic Standby".

ASSEMBLING AND PREPARING

Product Components

Please check whether all the components are included in the box before using the product. If there are missing components, contact the retail store where you purchased the product. Note that the product and components may look different from those shown here.

- Always use genuine components to ensure safety and product performance.
- The product warranty will not cover damage or injury caused by the use of counterfeit components.
- It is recommend that use the supplied components.
- If you use generic cables not certified by LG, the screen may not display or there may be image noises.

- Note that the components may look different from those shown here.
- Without prior notice, all information and specifications in this manual are subject to change to improve the performance of the product.
- To purchase optional accessories, visit an electronics store or online shopping site or contact the retail store where you purchased the product.

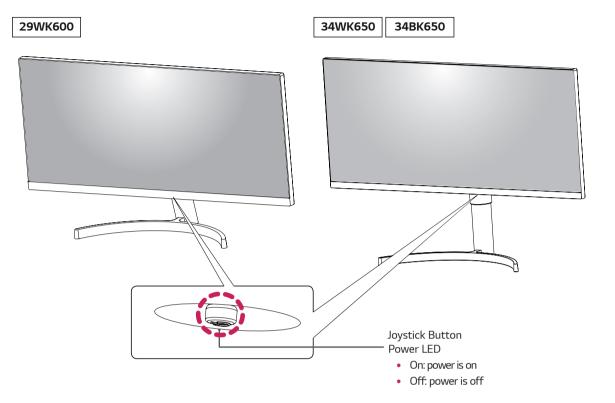

Supported Drivers and Software

Check the drivers and software supported by your product and refer to the manuals on the CD enclosed in the product package.

Drivers and Software	Installation Priority	29WK600/34WK650/34BK650
Monitor Driver	Recommended	0
OnScreen Control	Recommended	0
Dual Controller	Optional	0

- Required and Recommended: You can download and install the latest version from the enclosed CD or from the LGE website (www.lg.com).
- Optional: You can download and install the latest version from the LGE website (www.lg.com).

Component and Button Description

How to Use the Joystick Button

You can easily control the functions of the monitor by pressing the joystick button or moving it left/right with your finger.

Basic Functions

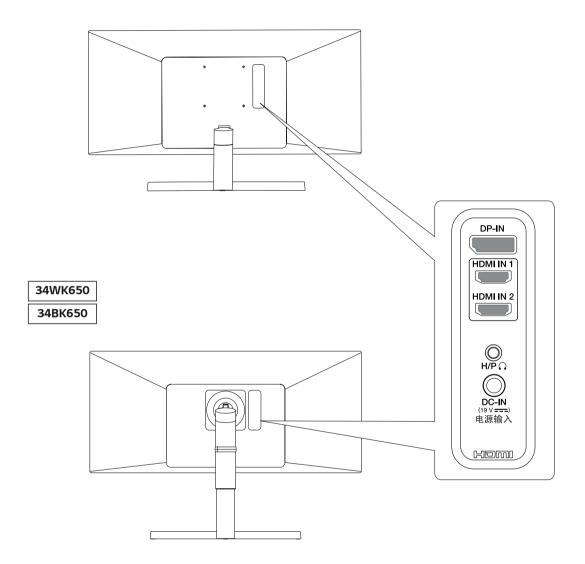

ella	Power on	Press the joystick button once with your finger to turn on the monitor.
Q	Power off	Press and hold the joystick button once with your finger to turn off the monitor.
◀/►	Volume Control	You can control the volume by moving the joystick button left/right.

• The joystick button is located at the bottom of the monitor.

Input Connector

29WK600

Moving and Lifting the Monitor

When moving or lifting the monitor, follow these instructions to prevent the monitor from being scratched or damaged and to ensure safe transportation regardless of its shape or size.

- It is advisable to place the monitor in the original box or packing material before attempting to move it.
- Before moving or lifting the monitor, disconnect the power cord and all cables.
- Hold the top and bottom of the monitor frame firmly. Do not hold the screen itself.

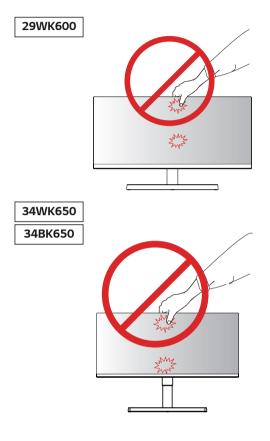

• When holding the monitor, the screen should face away from you to prevent it being scratched.

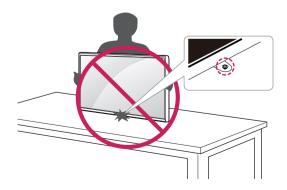

- When moving the monitor, avoid any strong shock or vibrations to the product.
- When moving the monitor, keep it upright, never turn the monitor on its side or tilt it sideways.

• As far as possible, avoid touching the monitor screen. This may result in damage to the screen or some of the pixels used to create images.

 If you use the monitor panel without the stand base, its joystick button may cause the monitor to become unstable and fall, resulting in damage to the monitor or human injury. In addition, this may cause the joystick button to malfunction.

Installing the Monitor

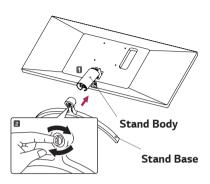

Assembling the stand base

CAUTION

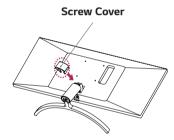

2

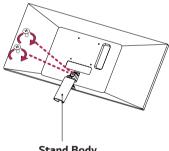

• To protect the screen from scratches, cover the surface with a soft cloth.

4

3

Stand Body

CAUTION

Applying excessive force when tightening the screws may cause damage to the monitor. Damage caused in this way will not be covered by the product warranty.

CAUTION

Be careful not to drop the stand. It may fall and hurt your foot.

• You can disassemble the stand in the reverse order of the assembly.

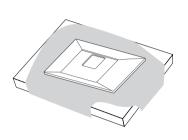

Installing the Monitor

Assembling the stand base

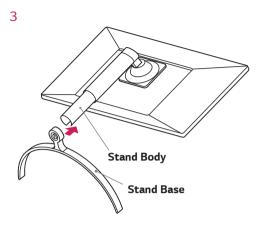

CAUTION

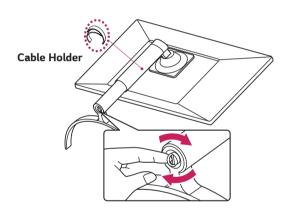

surface with a soft cloth.

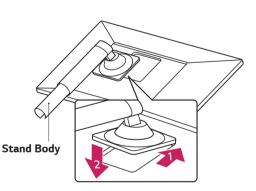

• To protect the screen from scratches, cover the

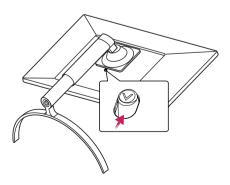

4

- Press the stand until the button reaches the top.

1

AUTION

- Illustrations in this document represent typical procedures, so they may look different from the actual product.
- Do not carry the monitor upside down by just holding the stand base. This may cause the monitor to fall off the stand and could result in personal injury.
- When lifting or moving the monitor, do not touch the monitor screen. The force applied to the monitor screen may cause damage to it.
- Do not apply foreign substances (oils, lubricants, etc.) to the screw parts when assembling the product. (Doing so may damage the product.)
- Applying excessive force when tightening screws may cause damage to the monitor. Damage caused in this way will not be covered by the product warranty.

NOTE

 You can disassemble the stand in the reverse order of the assembly.

Using the cable holder

34WK650

Arrange the cables using the cable holder as shown in the illustration.

34BK650

 Cable Holder

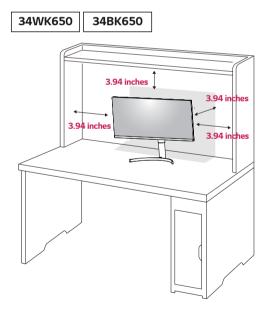

Installing onto a table

1 Lift the monitor and place it on the table in an upright position.

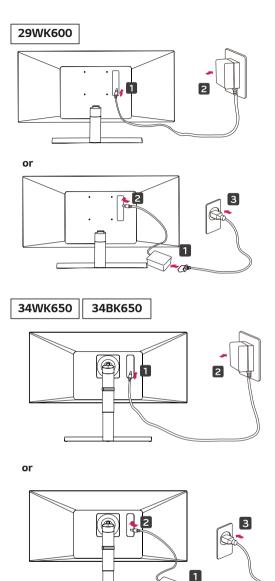

Place at least **3.94 inches** away from the wall to ensure sufficient ventilation.

29WK600

2 Connect the Power cord to the monitor, then plug the power cord into the wall outlet.

3 Press the joystick button on the bottom of the monitor to turn on the monitor.

• Unplug the power cord prior to moving or installing the monitor. There is risk of electric shock.

Cautions When Connecting Power Cord

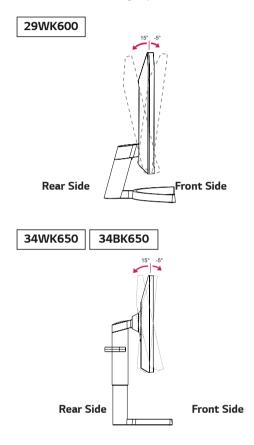

100-240 V ~

- Make sure to use the power cord that is provided in the product package and connect it to a grounded power outlet.
- If you need another power cord, please contact your local dealer or the nearest retail store.

Adjusting the angle

- 1 Place the monitor in an upright position, mounted on the stand base.
- 2 Adjust the angle of the screen. The angle of the screen can be adjusted forwards or backwards for a comfortable viewing experience.

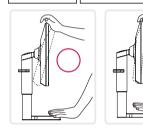

• To avoid injury to the fingers when adjusting the screen, do not hold the lower part of the monitor's frame as illustrated below.

29WK600

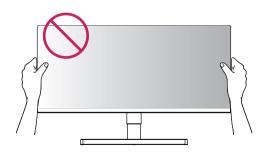

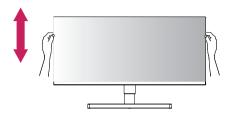

• Be careful not to touch or press the screen area when adjusting the angle of the monitor.

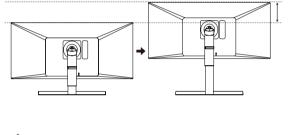

Adjusting the Stand Height

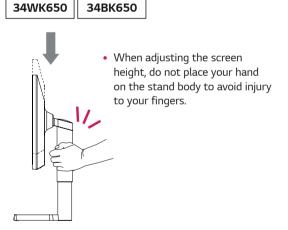

34WK650	34BK650
---------	---------

1 Handle the monitor with both hands for safety.

2 The height can be adjusted up to **4.33 inches**. **4.33 inches**

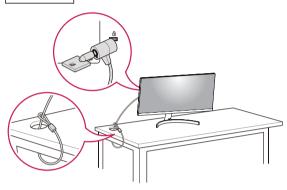

Using the Kensington lock

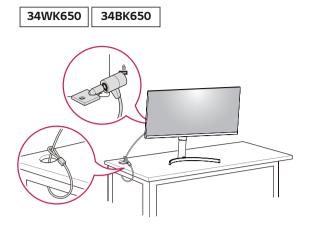

The Kensington security system connector is located at the back of the Monitor set.

For more information on installation and usage, refer to the Kensington lock user manual or visit the website at http://www.kensington.com.

Connect the Kensington security system cable between the Monitor set and a table.

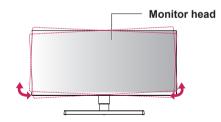

29WK600

Use of the Kensington lock is optional.
 The accessories can be purchased at your local electronics store.

• The left or right side of the monitor head can be slightly rotated up or down (up to 3°). Adjust the horizontal level of the monitor head.

Installing the wall mount plate

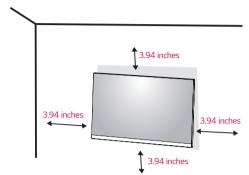

This monitor supports the specification of the standard wall mount plate or compatible device.

- Place the screen face down. To protect the screen from scratches, cover the surface with a soft cloth.
- 2 Place the wall mount plate onto the monitor and align it with the screw holes.
- 3 Tighten the four screws to fix the plate to the monitor using a screwdriver.

- The wall mount plate is sold separately.
- For more information on installation, refer to the wall mount plate's installation guide.
- Be careful not to use excessive force when mounting the wall mount plate, as this can damage the monitor's screen.

Installing to a wall

Install the monitor at least 3.94 inches away from the wall and leave about 3.94 inches of space at each side of the monitor to ensure sufficient ventilation. Detailed installation instructions can be obtained from your local retail store. Please refer to the manual to install and set up a tilting wall mounting bracket.

To install the monitor to a wall, attach a wall mounting bracket (optional) to the back of the monitor. Make sure that the wall mounting bracket is securely fixed to the monitor and to the wall.

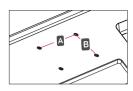

- If you use screw longer than standard, the monitor might be damaged internally.
- 2 If you use improper screw, the product might be damaged and drop from mounted position.In this case, LG Electronics is not responsible for it.

• Wall Mount (A x B)

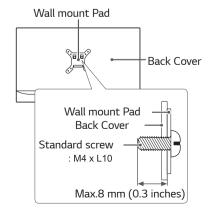

29WK600

34WK650 34BK650

- Unplug the power cord before moving or installing the monitor to avoid electric shocks.
- Installing the monitor on the ceiling or on a slanted wall may result in the monitor falling off, which could lead to injury. Please use the genuine LG wall mounting bracket. For more information, contact your local retail store or a qualified installer.
- Applying excessive force when fastening screws may cause damage to the monitor. Damage caused in this way will not be covered by the product warranty.
- Use the wall mounting bracket and screws that conform to the VESA standard. Damage caused by the use or misuse of inappropriate components will not be covered by the product warranty.
- Screw length from outer surface of back cover should be under 8 mm (0.3 inches).

- Use the screws specified by the VESA standard.
- The wall mount kit includes the installation guide and all necessary parts.
- The wall mounting bracket is optional. The accessories can be purchased at your local retail store.
- The length of the screw may differ for each wall mounting bracket. Ensure the correct length screw is used.
- For more information, please refer to the user manual for the wall mounting bracket.

USING THE MONITOR

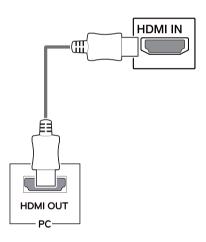

Connecting to a PC

• This monitor supports the *Plug and Play feature. *Plug and Play: A feature that allows you to add a device to your computer without having to reconfigure anything or install any manual drivers.

HDMI connection

Transmits the digital video and audio signals from your PC and A/V devices to the monitor. Connect your PC and AV device to the monitor with the HDMI cable as illustrated below.

Press the menu button and then select the input option from the input menu.

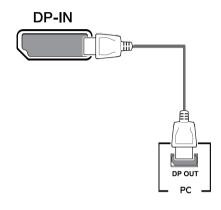

- If you use HDMI PC, it can cause compatibility problem.
- Use a certified cable with the HDMI logo attached. If you do not use a certified HDMI cable, the screen may not display or a connection error may occur.
- Recommended HDMI cable types
- High-Speed HDMI[®]/[™] Cable
- High-Speed $\mathrm{HDMI}^{\mathrm{e}}/^{\mathrm{TM}}$ Cable with Ethernet

DisplayPort connection

Transmits the digital video and audio signals from your PC to the monitor. Connect your PC to the monitor using the DisplayPort cable as illustrated below. Press the menu button and then select the input option from the input menu.

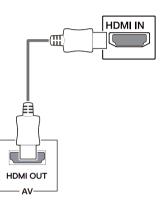

- There may be no video or audio output depending on the DP version of the PC.
- If you use generic cables not certified by LG, the screen may not display or there may be image noises.

Connecting to AV Devices

HDMI connection

Transmits the digital video and audio signals from your PC and A/V devices to the monitor. Connect your PC and AV device to the monitor with the HDMI cable as illustrated below.

Press the menu button and then select the input option from the input menu.

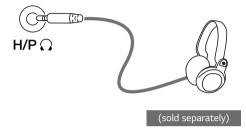

- Use a certified cable with the HDMI logo attached. If you do not use a certified HDMI cable, the screen may not display or a connection error may occur.
- Recommended HDMI cable types
- High-Speed HDMI[®]/[™] Cable
- High-Speed $\mathrm{HDMI}^{^{\!\!\!}}/^{^{\mathrm{TM}}}$ Cable with Ethernet

Connecting to External Devices

Connecting Headphones

Connect peripherals to the monitor via the headphones port. Connect as illustrated.

- Peripheral devices are sold separately.
- If you use angled earphones, it may cause a problem with connecting another external device to the monitor. Therefore, it is recommended to use straight earphones.

• Depending on the audio settings of the PC and external device, headphones and speaker functions may be limited.

USER SETTINGS

Activating the Main Menu

- 1 Press the joystick button on the bottom of the monitor.
- 2 Move the joystick up/down (\blacktriangle/∇) and left/right ($\blacktriangleleft/\triangleright$) to set the options.
- 3 Press the joystick button once more to exit the main menu.

Button	Menu Status		Description
	Main	menu disabled	Enables the main menu.
	Main menu enabled		Exits the main menu. (Holding down the button to turn off the monitor. You can turn off the monitor this way at any time, including when the OSD is on.)
	•	Main menu disabled	Adjusts the monitor volume level.
		Main menu enabled	Enters the Input feature.
		Main menu disabled	Adjusts the monitor volume level.
		Main menu enabled	Enters the Settings features.
		Main menu disabled	Displays information on the current input.
		Main menu enabled	Turns off the monitor.
	•	Main menu disabled	Displays information on the current input.
		Main menu enabled	Enters the Game features.

Main Menu Features

Main Menu	Description
Settings	Configures the screen settings.
Game	You can change Picture Mode to a gaming mode.
Input	Sets input mode.
Power Off	Turns off the monitor.
Exit	Exits the main menu.

User Settings

Menu Settings

- 1 To view the settings menu, press the joystick button at the bottom of the monitor and then enter the **Settings**.
- Configure the options by moving the joystick up/down/left/right. 2
- To return to the upper settings or set other settings items, move the joystick to ◀ or press (). 3
- 4 If you want to exit the settings menu, move the joystick to ◀ until you exit.

Quick Settings

CAUTION

• Your monitor's OSD (On Screen Display) may differ slightly from that shown in this manual.

Each option is described below.

Settings > Quick Set- tings	Description			
Brightness	Adjusts the s	Adjusts the color contrast and brightness of the screen.		
Contrast	Aujusts the C			
Volume	Adjusts the volume level.			
		TE CONTRACTOR OF CONT		
	 You can adjust Mute / Unmute by moving the joystick button to ▼ in the Volume menu. 			
Color Temp	Custom The user can adjust it to red, green, or blue by customization.			
	Warm	Sets the screen color to a reddish tone.		
	Medium	Sets the screen color between a red and blue tone.		
Cool Sets the screen color to a bluish tone.		Sets the screen color to a bluish tone.		
MaxxAudio	On	MaxxAudio [®] by Waves, recipient of a Technical GRAMMY Award [®] is a suite of studio-quality sound tools for a superior listening experience.		
	Off	Disables the MaxxAudio function.		

Settings > Input		Description			
Input List	Selects the inp	Selects the input mode.			
Aspect Ratio	Adjusts the as	pect ratio of the screen.			
	Full Wide	Displays the video in wide-screen, regardless of the video signal input.			
	Original	Displays video according to the aspect ratio of the video signal input.			
	Cinema1	Enlarges the screen with an aspect ratio of 21:9. (at 1080p)			
	Cinema2	Enlarges the screen with an aspect ratio of 21:9, including the black box at the bottom for subtitles. (at 1080p)			
	 NOTE There is no Cinema1, Cinema2 settings on FreeSync Mode. (Go to Picture → Game Adjust → FreeSync, to set FreeSync On or Off) 				

Picture Mode on SDR(Non-HDR) signal.

Settings > Picture		Description			
Picture Mode	Custom	Allows the user to adjust each element. The color mode of the main menu can be adjusted.			
	Reader	Optimizes the screen for viewing documents. You can brighten the screen in the set- tings menu.			
	Photo	Optimizes the screen for photos.			
	Cinema	Optimizes the screen for video.			
	HDR Effect	Optimizes the screen for high dynamic range.			
	Color Weakness	This mode is for users who cannot distinguish between red and green. It enables users with color weakness to easily distinguish between the two colors.			
	FPS Game 1	This mode is optimized for FPS games.			
	FPS Game 2	It has a higher Black Stabilizer value than FPS Game 1. It is suitable for very dark FPS games.			
	RTS Game	This mode is optimized for RTS Game.			
	Custom (Game)	In this mode, users can customize various elements including game-related options.			
	• If the picture r fected.	node is changed the screen may flicker or the resolution of your PC screen may be af-			

Picture Mode on HDR signal.

Settings > Picture		Description		
Picture Mode	HDR Vivid	Optimized the screen for HDR vivid colors.		
	HDR Standard	Optimized the screen for HDR.		
	HDR Game	Optimized the screen for HDR Games.		
	HDR Cinema	Optimized the screen for HDR video.		
	HDR On / Of • When the HI card perform • While the HI	: may not be operated properly depending on the Windows10 OS setting. Please check the f setting of Windows. DR function is turned on, the characters or picture quality may be poor according to Graphic lance. DR function is on, screen flickering or cracking may occur when changing the monitor input off according to Graphic card performance.		

Picture Adjust	Brightness	Adjusts the	brightness of the screen.
	Contrast	Adjusts the	contrast of the screen.
	Sharpness	Adjusts the	sharpness of the screen.
	SUPER RESOLUTION+	High	Optimized picture quality is displayed when a user wants crystal clear images. I is effective for high quality video or game.
		Middle	The optimized picture quality is displayed when a user wants images between low and high modes for comfortable viewing. It is effective for UCC or SD video
		Low	The optimized picture quality is displayed when a user wants smooth and natural im- ages. It is effective for slow-moving pictures or still images.
		Off	Select this option for everyday viewing. SUPER RESOLUTION+ is turned off in this mode.
		Because recomm	OTE this is a function to increase the sharpness of low resolution pictures, it is not ended to use the function for normal text or for desktop icons. Doing so may unnecessarily high sharpness.
	Black Level	Sets the off	set level (for HDMI only). a reference for a video signal, this is the darkest color the monitor can display.
		High	Keeps the current contrast ratio of the screen.
		Low	Lowers the black levels and raises the white levels from the current contrast ratio of the screen.
	DFC	On	Adjusts the brightness automatically according to the screen.
		Off	Disables the DFC feature.
Game Adjust	Response Time	Sets a response time for displayed pictures based on the speed of the screen. For a normal environment, it is recommended that you use Fast . For a fast-movin is recommended that you use Faster . Setting to Faster may cause image sticking.	
		Faster	Sets the response time to Faster.
		Fast	Sets the response time to Fast.
		Normal	Sets the response time to Normal.
		Off	Does not use the response time improvement feature.
	FreeSync	signal with t	mless and natural images by synchronizing the vertical frequency of the input hat of the output signal. UTION
		 Support necessa Support For more 	ted Interface: DisplayPort,HDMI. ted Graphic Card : A graphic card that supports AMD's FreeSync is ary. ted Version : Make sure to update the graphic card to the latest driver. re information and requirement, refer to AMD website at http://www. m/FreeSync
		On	FreeSync function on.

Game Adjust	Black Stabilizer	You can control the black contrast to have better visibility in dark scenes. Increasing the Black Stabilizer value brightens the low gray level area on the screen. (You can easily distinguish objects on dark game screens.) Reducing the Black Stabilizer value darkens the low gray level area and increases the dynamic contrast on the screen.			
	Cross Hair	 Cross Hair provides a mark on the center of the screen for First Person Shooter (FPS) games. Users can select the cross hair that fits their gaming environment among four different cross hairs. When the monitor is off or enters energy saving mode, the Cross Hair feature is automatically turned Off. 			
Color Adjust	Gamma	Mode 1, Mod 2, Mode 3	e The higher the gamma value, the darker the image becomes. Likewise, the lower the gamma value, the lighter the image becomes.		
		Mode 4	If you do not need to adjust the gamma settings, select Mode 4.		
	Color Temp	Custom	The user can adjust it to red, green, or blue by customization.		
		Warm	Sets the screen color to a reddish tone.		
		Medium	Sets the screen color between a red and blue tone.		
		Cool	Sets the screen color to a bluish tone.		
	Red	You can custo	You can customize the picture color using Red , Green , and Blue colors.		
	Green				
	Blue				
	Six Color	Meets the user requirements for colors by adjusting the hue and saturation of the six co (Red, Blue, Green, Cyan, Magenta and Yellow) and then saving the settings.			
		Hue	Adjusts the tone of the screen colors.		
		Saturation	Adjusts the saturation of the screen colors. The lower the value, the less saturated and brighter the colors become. The higher the value, the more saturated and darker the colors become.		
Picture Reset	Do you want to P	icture reset yo	ur settings?		
	No	Cancel			
	Yes	Reset			

Settings > Sound	Description	
Volume	To adjust the Volume of headphone or speaker.	
MaxxAudio	On MaxxAudio [®] by Waves, recipient of a Technical GRAMMY Award [®] is a suit quality sound tools for a superior listening experience.	
	Off	Disables the MaxxAudio function.

Settings > General	Description		
Language	Sets the menu screen to the desired language.		
SMART ENERGY	High	Saves energy using the high-efficiency SMART ENERGY SAVING feature.	
SAVING	Low	Saves energy using the low-efficiency SMART ENERGY SAVING feature.	
	Off	Disables the SMART ENERGY SAVING feature.	
Power LED	On	The power LED turns on.	
	Off	The power LED turns off.	
Automatic Standby		atically turns off the monitor when there is no movement on the screen for a period t a timer for the auto-off function. (Off, 4 H, 6 H, and 8 H)	
HDMI Compatibility	HDMI Compatibility	Mode feature can recognize the legacy equipment that does not support HDMI 2.0.	
Mode	On	Enables HDMI Compatibility Mode.(HDMI Version 1.4)	
	Off	Disables HDMI Compatibility Mode.(HDMI Version 2.0)	
DisplayPort 1.2	 NOTE If the connected device does not support HDMI Compatibility Mode, the screen or sound may not work properly. When HDMI Compatibility Mode is on, HDR function is not supported. Some older graphics cards do not support HDMI 2.0, but you can select HDMI 2.0 resolution in the control panel of window. This may cause the screen to appear abnormally. 		
	graphics card. S	igure this option according to the DisplayPort version supported by your Set this option to Disable if your graphics card does not support DisplayPort 1.2.	
Buzzer		u set the sound generated from Buzzer when your monitor powers on.	
	On	Enables your monitor's Buzzer .	
	Off	Disables your monitor's Buzzer .	
OSD Lock	This feature disables the configuration and adjustment of menus.		
	On	Enables OSD Lock.	
	Off Disables OSD Lock. Image: Disables OSD Lock NOTE • All features are disabled except Brightness, Contrast, Volume, Input, OSD Lock, Information.		
	All features are	e disabled except Brightness, Contrast, Volume, Input, OSD Lock, Information.	
Information		e disabled except Brightness, Contrast, Volume, Input, OSD Lock, Information.	
Information Reset		tion will be shown the Model, Serial Number, Total Power On Time, Resolution.	
	The display informa	tion will be shown the Model, Serial Number, Total Power On Time, Resolution.	

• Saving Data depends on the Panel. These values vary by panel and vendor. If the option **SMART ENERGY SAVING** is set **High** or **Low**, then monitor luminance becomes higher or lower depending upon the source.

TROUBLESHOOTING

Nothing is displayed on the screen. Is the monitor's power cord plugged in? • Check if the power cord is correctly plugged into the power outlet. • Test the Power Plug using a lamp or other device. Is the power LED on? • Check the power cable connection and press the power button. Is the power on and the power LED • Check that the connected input is enabled (Settings > Input > Input list). displaying white? Is the power LED blinking? • If the monitor is in sleep mode, move the mouse, or press any key on the keyboard, to switch the display on. Check if the computer is turned on. Is the OUT OF RANGE message being • This occurs when signals transferred from the PC (graphics card) are out displayed? of the horizontal or vertical frequency range of the monitor. Please see the Product Specification section of this manual to set the appropriate frequency. Is the No Signal message being • This is displayed when the signal cable between the PC and the monitor is displayed? missing or disconnected. Check the cable and reconnect it.

The OSD lock message is being displayed.				
Are some functions not available when you press the Menu button?	 The OSD is locked. Go to Settings > General and set OSD Lock to Off. 			

The screen retains an image.		
Does image sticking occur even when the monitor is turned off?	 Displaying a still image for a prolonged time may cause damage to the screen, resulting in the retention of the image. To extend the lifetime of the monitor, use a screensaver. 	

Screen display is unstable and shaky / Images displayed on the monitor leave shadow trails.		
Did you select the appropriate resolution?	 If the selected resolution is HDMI 1080i 60/50 Hz (interlaced), the screen may be flickering. Change the resolution to 1080P or the recommended resolution. 	

- Vertical frequency In order to display an image, the screen must be refreshed dozens of times per second, like a fluorescent lamp. The number of times the screen is refreshed per second is called vertical frequency, or refresh rate, and is represented by Hz.
- Horizontal frequency The time it takes to display one horizontal line is called the horizontal cycle. If 1 is divided by the horizontal interval, the result is the number of horizontal lines displayed per second. This is called horizontal frequency and is represented by kHz.
- LED can be lighted with Set OSD Menu.
 Settings > General > Power LED > On

- Check if the graphics card's resolution or frequency is within the range allowed by the monitor and set it to the recommended (optimal) resolution in **Control Panel > Display > settings**.
- Not setting the graphics card to the recommended (optimal) resolution may result in blurred text, a dimmed screen, a truncated display area, or misalignment of the display.
- The setting methods may be different depending on the computer or operating system, and some resolutions may not be available depending on the performance of the graphics card. If this is the case, contact the manufacturer of the computer or graphics card for assistance.
- Some graphics cards may not support 2560×1080 resolution. If the resolution cannot be displayed, contact the manufacturer of your graphics card.

The display color is abnormal.			
Does the display appear discolored (16 colors)?	 Set the color to 24 bit (true color) or higher. In Windows, go to Control Panel > Display > Settings > Color Quality. 		
Does the display color appear unstable or monochrome?	Check if the signal cable is connected properly. Reconnect the cable or		
	reinsert the PC's graphics card.		
Are there spots on the screen?	• When using the monitor, pixilated spots (red, green, blue, white, or black)		
	may appear on the screen. This is normal for an LCD screen. It is not an		
	error, nor is it related to the monitor's performance.		

Do you see an "Unrecognized monitor, Plug&Play (VESA DDC) monitor found" message?				
Have you installed the display driver?	• Be sure to install the display driver from the display driver CD (or diskette) that comes with your display. Or, you can also download the driver from			
	our web site: http://www.lg.com. Make sure to check if the video card supports Plug&Play function.			

No sound from the headphone port or speaker.			
Are images displayed using DisplayPort or HDMI input without sound?	 Try increasing the volume using the button on the monitor. Set the audio output of the PC to the monitor you are using. On Microsoft Windows, go to Control Panel > Hardware and Sound > Sound > set the monitor as default device.
